U.S. E.P.A. Region V
230 South Dearborn St.
Chicago, IL 60604

Dear Mr. Longo:

Please find enclosed a Well Completion Documentation Report as transmitted by IT Corporation. The groundwater sampling system at Ethyl Petroleum Additives has been installed and the water has been sampled. Four sampling wells were installed according to the proposal submitted by IT Corporation.

Drilling and well installation were completed during the week of August 4, 1986. Further well development was necessary and was completed on August 11 and August 14.

Slight deviations from the original plan were necessary due to certain field conditions and obstacles. In particular, well number four was located approximately 45 feet further north than in the initial proposal because of overhead piping.

The wells were sampled on September 4, 1986, three weeks after they were developed. Scheduling with the testing company caused some delay. Results are expected during the week of September 29, and will be forwarded to you shortly thereafter.

Also enclosed is a map of the area showing the locations of each well.

Sincerely,

A handwritten signature in dark ink, appearing to read "M. J. Bonaventure".

M. J. Bonaventure
Environmental Supervisor
